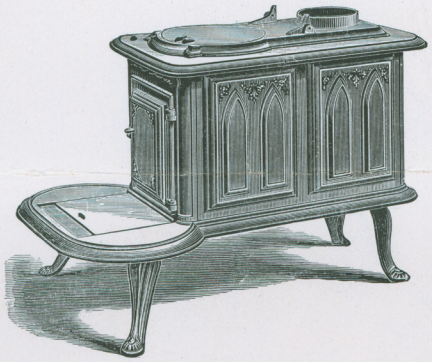
SUPERIOR BOX STOVE

A DURABLE AND EFFICIENT WOOD HEATER

For Stores, Lodge Rooms, Halls, Schools, Farm Buildings and Camps.



This stove has a swing-up top with removable cover, opening the greater part of the top for convenience in putting in large sticks of wood.

There is also a very large end feed door, and a sliding draft for the easy regulation and control of the fire.

These heaters can be enclosed in galvanized iron casings, on special orders, to particularly adapt them to school room or shop use. Details upon request.

THE CASTINGS ARE EXCEPTIONALLY HEAVY AND DESIGNED TO STAND THE MOST SEVERE USAGE.

Made in the following sizes:

No. 124 burns wood 24 inches long.
No. 130 burns wood 30 inches long.
No. 136 burns wood 36 inches long.

MANUFACTURED BY

Portland Stove Foundry Company

PORTLAND, MAINE

Contributed to Maine Memory Network by Maine Historical Society
(Coll. 1863, Box 1 General)
Date: ca.1880
Description: Stove advertisement
