How License Has Worked With Our Neighbors

In a few years of license the annual pauper expense of Burlington, Vermont rose from $8,000 to $18,000.

License would produce a like result in Sagadahoc.

DO YOU WANT IT?

The following graphic illustration of the experience of New Hampshire most clearly shows the evil results that surely follow license.

The Evils of a License Law

A license law would put the liquor question more in politics than at present, and not take it out as claimed by the license advocates.

License or no license would be the dominant issue in the annual spring election in every city and town in the state.

What becomes of the revenue from license?

It is more than consumed by the extra expense due to police, prisons and paupers to say nothing of the vice, crime and corruption it creates. This is absolutely proven by the experience with license in other states.

A majority vote of the people will decide the result.

A two-thirds vote is not needed.

DO NOT BE DECEIVED.

VOTE NO!

VOTE
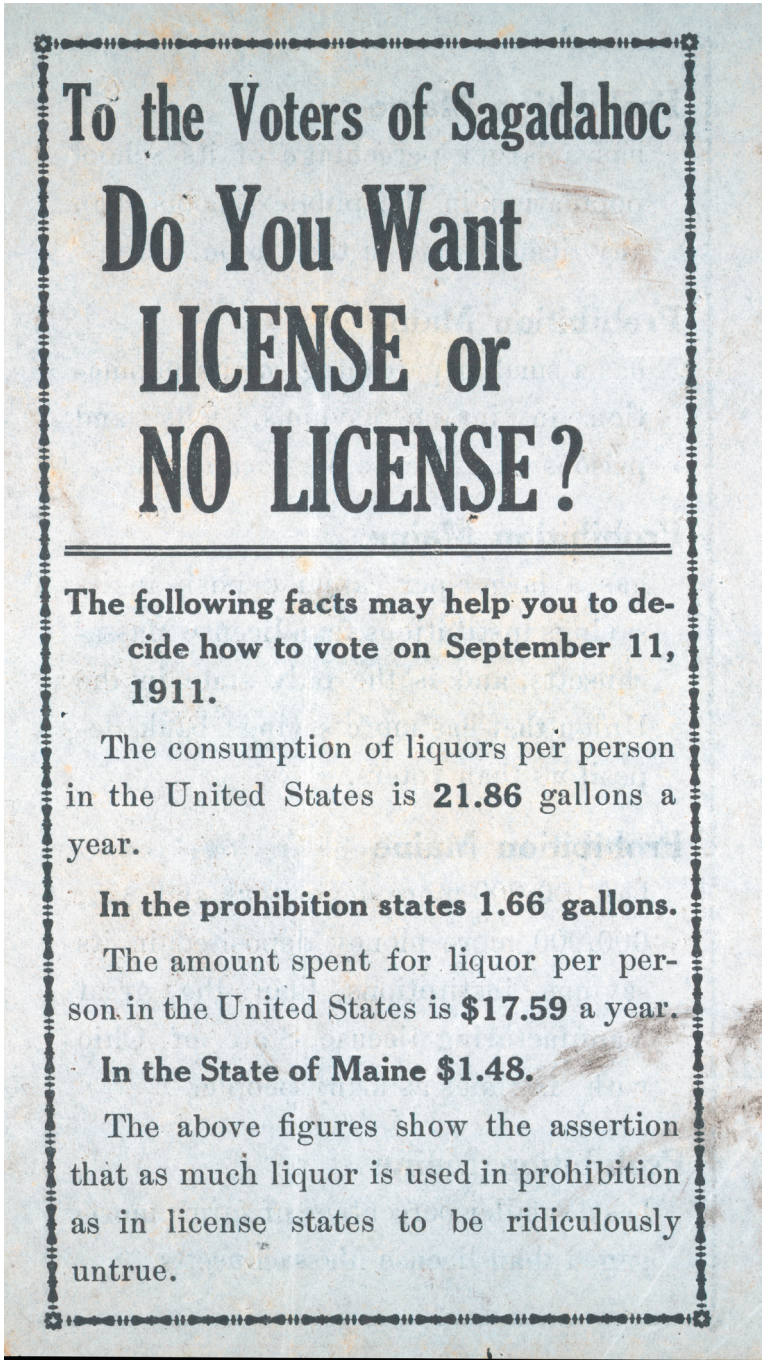
N O



To the Voters of Sagadahoc

Do You Want LICENSE or NO LICENSE?

The following facts may help you to decide how to vote on September 11, 1911.

The consumption of liquors per person in the United States is **21.86** gallons a year.

In the prohibition states 1.66 gallons.

The amount spent for liquor per person in the United States is **$17.59** a year.

In the State of Maine $1.48.

The above figures show the assertion that as much liquor is used in prohibition as in license states to be ridiculously untrue.
