

John Winslow Deposeth, and saith, that on the twelfth of July last past he arrived with Part of the Regiment then under his Command, at a Place called Cushenoc, on Kennebeck River, remained there till the twenty first, then we sett forwards for Teronnett Falls, with two Gundeloes, nine Whale Boats, twenty Battoes including the Canoes. That on the twenty Second about five miles distant from Cushenoc now called Forte Western, they were Interrupted by Shoals, and after by the Waters being Confined by the Rocks to a Narrow Compass, and what we for that Reason called the first Falls, which the Deponant apprehends, in about Twelve Rods, Falls about two Feet. This Day most of our Men were employed in Toweing, and heaving out Gundeloes over the Shoals and Fall, and Even the whale Boats that were Laden to take the Same Course to gain their Pointe. On the twenty third were harrassed with Continual Shoals, & Strong Currants, at Some Places, not more than Eighteen Inches of Water as the Deponant apprehends, Distance at Night, about twelve miles from Forte Western, did not proceed above that Day, and that obtained by Force of Men in the Water, being Six Inches Less than the Biggest Boats Drew, & of this the Deponant, is Confident, as he was with others in the Water, the Bigger Part of that Day. On the twenty fourth, after haveing Part, over a Shoal, or Fall, we Came to what we Called the great Fall, Distance from Forte Hallifax about five Miles, and at that Place the Deponant beleives the Water falls four Feet, in four Rods the Bottom Rocks, tho' more Water in the middle of the Stream than our Boats drew by Some Feet, half way between this & Forte Hallifax, is one other Place we Determined Falls, Further the Deponant adds, that in many Places, in the River, were Shoals and Sands that there was not Sufficient Water, for a whale Boat. Our People Passing up and Down, frequently obliged to Get out and in Several Places, not more than Eighteen or twenty Inches of Water, and were Shoals, the Stream, extream Rapid. Our Gundeloes drew about two Feet, the biggest of them.

And Further the Deponant adds that he remained

John Winslow Deposeth, and saith, that on the twelfth of July last past, he arrived with Part of the Regiment then under his command, at a Place called Cushenoc, on Kennebeck River, remained there till the twenty first, then we sett forwards for Teronnett Falls, with two Gundeloes, nine Whale Boats, twenty Battoes including the Canoes. That on the twenty Second about five miles distant from Cushenoc now called Forte Western, they were Interrupted by Shoals, and after by the Waters being Confined by the Rocks to a Narrow Compass, and what we for that Reason Called the first Falls, which the Deponant apprehends, in about Twelve Rods, Falls about two Feet. This Day most of our men were employed in Toweing, and heaving our gundeloes over the Shoals and Falls, and Even the whale Boats that were Laden to take the Same Course to gain their Pointe. On the twenty third were harrassed with Continual Shoals, & Strong Currants, at Some Places, not more than Eighteen Inches of Water as the Deponant apprehends, Distance at Night, about twelve miles from Forte Western, did not proceed above Two miles above that Day, and that obtained by Force of Men in the Water, being Six Inches Less than the Biggest Boats Drew, & of this the Deponant, is Confident, as he was with others in the Water, the Bigger Part of that Day. On the twenty fourth, after haveing Part, over a Shoal, or Fall, we Came to what we Called the great Fall, Distance from Forte Hallifax about five Miles, and at that Place the Deponant beleives the Water falls four Feet, in four Rods the Bottom Rocks tho' more water in the middle of the Stream than our Boats drew by Some Feet, half way between this & Forte Hallifax, is one other Place we Determined Falls, Further the Deponant, adds, that in many Places, in the River, were Shoals and Sands that there was not Sufficient Water, for a whale Boat. Our People Passing up and Down, frequently obliged to Get out and in Several Places, not more than Eighteen or twenty Inches of Water, and were Shoals, the Stream, extream Rapid. Our gundeloes drew about two Feet, the biggest of them.

And Further the Deponant adds that he remained

Remained on said River from the said twenty first Day of July, till the twenty First of September, and in that time Passed up and Down s^d River from Forte Hallifax to Forte Western, five times, and he takes it for granted, that it was the Season of the Year, when the Water was at the lowest and informed by the Indians that it was Lower than Common at that Season, and by the Appearance of the Banks Trees Logged &c. on each Side of the River, the Water at the time of the Freshets, on each Side of the River, is at least twelve feet higher perpendicular than when the Deponant was there, and beleives at such time there is no appearance of Falls, at the Places before recited, the Deponant further adds, that he once Steered up a whale Boat from Forte Western, to Forte Hallifax, without a Man's getting out tho' oft times strucht the grou^d, and has more than once Come down in the same Manner.

And Further Saith that for Thirty years past he has been acquainted with the Eastern Shore Survey at Brad Bay Pemequid &c. & never heard any other Name Given for the River before mentioned where it Emptys into the Ocean than that of Kennebeck and That he according to his Best Remembrance Judges that the Gundeloes that was the Least above watter was Nine Inches —
